

WHAT IS CLAIMED IS:

1. A case for storing and carrying light and moisture protected product, comprising:

a product container having an interior compartment for containing at least one unit of product therein, said product container further having a first latching member;

a recloseable lid attached to said product container, said recloseable lid having a second latching member configured for engaging said first latching member in said product container; and,

a finger release structurally associated with said recloseable lid for disengaging said first latching member from said second latching member.

2. The case recited in claim 1 wherein said product container and said recloseable lid each comprises a high density polyethylene material.

3. The case recited in claim 1 wherein said first latching member is a notch formed in a top edge exterior portion of said product container and said second latching member is a protruding lip configured for engaging said notch.

4. The case recited in claim 3 wherein said protruding lip further includes a finger latch release for disengaging said protruding lip from said notch.

5. The case recited in claim 1 further including a carrying strap attached to an exterior portion of said product container.

6. The case recited in claim 5 wherein said carrying strap is molded to said exterior portion of said product container.

7. The case recited in claim 1 further comprising a clip affixed to an exterior portion of said product container.

8. The case recited in claim 1 further containing a product partition removably arranged in said interior compartment for separating an individual product.

9. The case recited in claim 1 wherein said recloseable lid is hingably attached to said product container.

10. The case recited in claim 8 wherein said product partition is made of a flexible paperboard material.
